Technical Skills

- **Core Languages** - Java, JavaScript
- **Web Technologies** - JavaScript, HTML5, CSS3, Bootstrap, React.js
- **Version Control** - Git
- **Tools** - GitHub, VS-Code, WordPress, Adobe Photoshop, Figma, Netlify

Education

Global Institute Of Technology
B.tech/CSE

Aug 2019 – Jun 2023

Govt. Sr. Sec. School
12th – Science from RBSE

Jul 2018 – Jun 2019

Projects

Personal Portfolio Website

Aug 2024 – Aug 2024

Designed and developed a personal portfolio website to showcase my projects, skills, and experience. The website serves as a professional online presence, highlighting my frontend development capabilities.

Key Features:

- **Responsive Design:** Implemented a fully responsive layout using HTML and CSS, ensuring optimal performance across desktops, tablets, and mobile devices.
- **Project Showcase:** Created a dedicated section to display detailed descriptions, images, and links to live demos and GitHub repositories for each project.
- **Skills Overview:** Organized technical skills into categorized sections, providing a clear and concise view of core languages, web technologies, version control, and tools.
- **Downloadable Resume:** Integrated a button for visitors to easily download my resume in PDF format, enhancing accessibility for potential employers.
- **Navigation and User Experience:** Developed a smooth, intuitive navigation system with anchor links and a sticky header for easy access to different sections of the site.
- **Tech Stack:** HTML5, CSS3, JavaScript (ES6+)

Weather App

July 2024 – Aug 2024

Designed and developed a fully responsive weather application, delivering real-time weather updates for any global location using cutting-edge web technologies.

Key Features:

- **Real-Time Data Integration:** Leveraged a robust weather API to fetch and display live temperature, and weather conditions.
- **User-Centric Interaction:** Implemented a seamless search functionality, enabling users to retrieve weather data by city name with instant, real-time updates.
- **Responsive UI/UX Design:** Created a mobile-first design ensuring optimal performance and user experience across various devices, including mobile, tablet, and desktop.
- **Efficient Data Handling:** Utilized the Fetch API to handle asynchronous requests, ensuring smooth data retrieval and display without page reloads.
- **Tech Stack:** HTML5, CSS3, JavaScript (ES6+), Fetch API, RESTful API Integration
